RE: Doctors Revenue Management Services

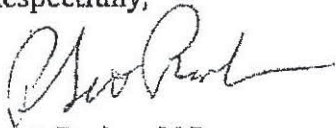

To Whom It May Concern:

It gives me great pleasure to recommend Doctors Revenue Management Services to any medical group or solo provider that is seeking to outsource their medical billing and credentialing.

I switched from a bigger billing company to partnership with Doctors Revenue Management Services because I felt like I wasn't getting the immediate attention I needed as a small solo practice. Gerri Monhollen transitioned my medical billing from another billing agency to Doctors Revenue Management Services without any cash flow interruptions. She administratively worked well with my Office Manager to train our staff to setup my appointment scheduler and e-scripts in a new practice management software within 10 days. Her performance and dedication were phenomenal.

She is very knowledgeable in the medical field and has my utmost respect as a business partner. She is honest, fair and professional. You can trust her billing company to deliver the financial results needed to succeed. The billing staff collaborated with my staff in a friendly, professional manner to ensure our patients were happy and claims were filed in "real time". Doctors Revenue Management Services is a small billing company that makes a huge financial difference. I say without hesitation that, in my experience, they are the best team to get doctors paid promptly and correctly.

Respectfully,

Scott Becker, M.D.
